Display Accessories

MOTOMETER

Our MOTOMETER Display instruments accessories

MOTOMETER offers a wide range of accessories for its guided display instruments, enabling users to make small additions to the devices themselves. The program ranges from lamp sockets to damping rings.

MOTOMETER also offers customized solutions at any time if a special design or a different value range is required. Special solutions, e.g. with a white dial and chrome front ring, are already available in many cases.
