MOTOMETER

Universal Adapter Set glow plug

Our MOTOMETER Universal Adapter Set glow plug

Are you tired of searching for the right glow plug adapter every time you conduct a diesel compression pressure test? With our Universal Adapter Set, you're now well-equipped. Our set allows you to perform compression pressure measurements on a variety of engines through the glow plug bore in just a few steps. Simply screw the corresponding threaded adapter and sealing cone onto the adapter tube quickly, and you'll have the right adapter at hand.

Our adapter set is not only time-saving and cost-effective but also compatible with almost all glow plugs. Make your life easier and invest in our Universal Adapter Set.

If you have any questions or specific product requirements, we're here to help. Contact us now and optimize your diesel compression pressure tests!
