

Lever-Type Level Sensor

MOTOMETER

Our MOTOMETER Lever-Type Level Sensor

Our high-quality Lever-type level sensor is utilized in a variety of vehicles and machinery to accurately measure the current tank content and transmit the data to the tank gauge.

Our MOTOMETER Lever-type level sensor is suitable for both diesel and gasoline fuels and are available in various configurations. It operates in both 12-volt and 24-volt electrical systems. The resistance measures 180 ohms when the tank is full and 3 ohms when it's empty. Please note that our Lever-type level sensor is not ground-free.
