

Temperature sensors & switches

MOTOMETER

MOTOMETER Temperature sensor

MOTOMETER temperature sensors have a NTC resistor, that records the temperature of oil, water or air and forwards the measurement result to a temperature display. Brass casings are used, along with a special gel in the sensor housing, for the fast transfer of the detected temperature with little loss.

Operation is possible with 12 Volt or 24 Volt on-board supply system. The temperature range is between 40 °C and 120 °C or between 50°C and 150°C, depending on the type.

In addition to the listed standard temperature sensors, we can also offer you customised solutions.

The following temperature sensors are available:

- Temperature sensor (40 °C – 120 °C)
- Temperature sensor (50 °C – 150 °C)
- Temperature sensor with warning contact
- Temperature switch

Example: A drawing of a temperature sensor

Special wishes? We deliver customized solutions!

In addition to the standard temperature sensors listed, we can also offer you customized specific solutions. Simply contact us with your requirements via the adjacent button:

MOTOMETER

Temperature sensor with warning contact

Temperature sensors with a warning contact are used in vehicles and machines to record the temperature of oil, water or air and to forward the measurement result to a temperature display. A warning contact is closed at the same time as a defined temperature is reached.

MOTOMETER temperature sensors with a warning contact have a NTC resistor, a brass casing and a special gel for rapid temperature transfer with little loss. The pre-tensioned bimetal strips are relaxed when the defined temperature is reached and the contact close.

Operation is possible with 12 Volt or 24 Volt on-board supply system. The switching capacity is 3 W.

The resistance characteristic is identical for all sensor

60 °C	134,0 Ohm
90 °C	51,2 Ohm
100 °C	38,5 Ohm

Compatible with MOTOMETER temperature displays

641 011 xxxx
641 012 xxxx
Also mass-free available.

Warning contact (+/-3 °C)	Thread	Measuring range	Connection	Art. Nr.
80 °C	M14 x 1,5	40 – 120 °C	A 6,3 x 0,8	642 016 1001

Temperature sensors & switches

MOTOMETER

Temperature switch

Temperature switches are used in vehicles and machines to record the temperature of oil, water or air and to close a warning contact when a defined temperature is reached.

The MOTOMETER temperature switches have pretensioned bimetal strips. The use of brass casings and a special integrated gel allows fast temperature transmission with little loss. When the respective temperature range is reached, the pre-tensioning is released and the contact is closed with a switching capacity of 3 W or 100 W.

Operation is possible with an onboard 12 Volt or 24 Volt mains. The voltage for all temperature switches is 6 - 24 volts.

MOTOMETER temperature switches are also available mass-free.

In addition to the listed standard temperature switches, we can also offer you customised solutions.

Warning contact	Tolerance	Thread	Connection	Switching capacity	Features	Art. Nr.
55 °C	+/- 3 °C	M14 x 1,5	A 6,3 x 0,8	100 W	mass-free	610 006 1006
